INTERNATIONAL **TRADE** ADMINISTRATION

FACT SHEET

Commerce Preliminarily Finds Dumping of Imports of Collated Steel Staples from China

- On January 3, 2020, the Department of Commerce (Commerce) announced its affirmative preliminary determination in the antidumping duty (AD) investigation of imports of collated steel staples from China.
- The AD law provides U.S. businesses and workers with a transparent, quasi-judicial, and internationally accepted mechanism to seek relief from the market distorting effects caused by injurious dumping of imports into the United States, establishing an opportunity to compete on a level playing field.
- For the purpose of AD investigations, dumping occurs when a foreign company sells an imported product in the United States at less than fair value.
- Commerce assigned a preliminary dumping rate of 301.64 percent for mandatory respondent Tianjin Hweschun Fasteners Manufacturing Co., Ltd. (Tianjin Hweschun). Commerce applied this rate to the other mandatory respondent, Tianjin Jin Xin Sheng Long Metal Products Co., Ltd. (Tianjin JXSL) as well as the non-selected respondents eligible for a separate rate and the China-wide entity.
- On November 9, 2019, Commerce preliminarily determined that "critical circumstances" exist with respect to imports of collated staples from China shipped by Tianjin Hweschun and all other Chinese producers/exporters, except for Tianjin JXSL. Commerce now finds that critical circumstances also exist with respect to Tianjin JXSL. Consequently, Commerce will instruct CBP to impose provisional measures retroactively on all entries of collated staples from China, effective 90 days prior to publication of the preliminary determination in the Federal Register.
- As a result of this preliminary affirmative determination, Commerce will instruct U.S. Customs and Border Protection (CBP) to require cash deposits from importers of collated steel staples from China based on these preliminary rates.
- The petitioner is Kyocera Senco Industrial Tools, Inc. (Cincinnati, OH).
- The scope of this investigation is listed in Appendix I.
- In 2018, imports of collated steel staples from China were valued at an estimated \$88.8 million.
- The Preliminary Decision Memorandum is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>, and to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. Please refer to case number A-570-112.

NEXT STEPS

- Commerce is scheduled to announce its final determination by May 19, 2020.

- If Commerce makes an affirmative final determination, and the U.S. International Trade Commission (ITC) makes an affirmative final determination that imports of collated steel staples from China materially injure, or threaten material injury to, the domestic industry, Commerce will issue an AD order. If either Commerce or the ITC issues a negative final determination, no AD order will be issued. The ITC is scheduled to make its final injury determination approximately 45 days after Commerce issues its final determination, if affirmative.
